Use

Sweep or vacuum up excess dirt.

Cleaning after completed installation or construction work, intensive deep cleaning: dilute with water in a ratio of 1:10. In case heavier soiling, this concentration can be increased accordingly (1:5). Apply the cleaning solution evenly on the floor and after 15 minutes of action, scrub the entire area with a mop or a single-spool rotary machine with a red pad or brush. Vacuum up the dissolved dirt with a water vacuum cleaner and thoroughly neutralize the entire surface with clean water until all residues of the cleaning solution are completely removed.

Note: Forteclean Intense Cleaner does not remove the polymer protective layer.
